NWCG Interagency I-Suite Stabilization and Support Project

I-Suite Version 5.01.00
Release Notes

Date: May 5, 2005

Release: I-Suite 5.01.00

Description: The primary focus of this release is to correct several known bugs and to make minor changes to the application to meet incident and business community needs
The following criteria were used to identify items to be included in the 2005 release:

- Coding to accomplish the task would role over to the 2006 release.
- The change request would meet current business requirements.
- Changes would **significantly** benefit the user.

## Important things to know prior to installing version 5.01.00

- System administrative privileges are required to properly install I-Suite.
- The installation of I-Suite Version 5.01.00 will overwrite the previous version.
- To utilize an existing 2004 database, it must first be converted to 2005 using the Incident Merge/Split Program.

Please visit the I-Suite webpage for specific information on the installation process and user documentation http://isuite.nwcg.gov.
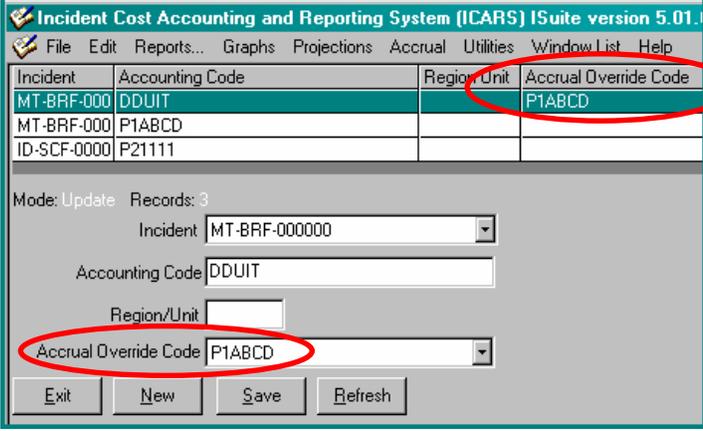

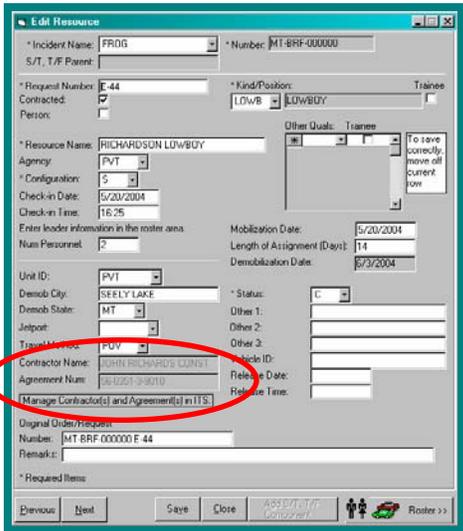

Refer to the following tables for specific information.

Change Category	Description
Bug	Application Error
Mod	Modification to an existing functionality
UI	User Interface
New	New functionality
Consistency	Functionality should be the same throughout the application

| Application Change Identifier	Module/ Process Affected	Change Category	Description
69	Admin Tool	Bug	• A runtime error will no longer occur when you attempt to create a repository file with more than 7 incidents in the database.
23	Admin Tool	New	• The ability to create automated database backups has been added. This routine allows the user to define intervals and the save path.
269	ALL	Bug	• All request numbers in drop down boxes will sort correctly.
397	ALL	Bug	• The server and database name on the status bar will display correctly in all modules.
178	ALL	Mod	• The warning message "Demobing resource within 5 days of check-in" will no longer display when entering a release date.
N/A	Database	Mod	• The Home Unit table, Jetport table, Kind Code table and Rates table have been updated with current data.
198	IAP	Bug	• The ICS-204 "Last Name, First Name" formatting option functions correctly.

| Application Change Identifier	Module/ Process Affected	Change Category	Description
271	IAP	Bug	• IAP no longer terminates when the ICS-220 is finalized from page 2.
279	IAP	Bug	• IAP no longer terminates when attempting to save a form after deleting the data in the "time prepared" block on all forms. • Date and time validation will occur when you save or close a form.
280	IAP	Bug	• The "Clear" button in block 6 of the ICS-204 template correctly enables the resource selection buttons on the ICS-204 template.
281	IAP	Bug	• Forms will save correctly when only a font change is made.
282	IAP	Bug	• IAP no longer terminates when the Line Overhead button is selected in block 6 of the ICS-204.
303;311, 324	IAP	Bug	• The tab order on the ICS-202, ICS-203, ICS-206 and ICS-220 function correctly.
305	IAP	Bug	• The left and right scroll option displays correctly when the ICS-220 is maximized.
322	IAP	Bug	• When several ICS-204 Forms are open and a row is deleted, the row will only delete from the visible form.
323	IAP	Bug	• The ICS-206 no longer allows selecting both yes and no in the paramedic's column on the same row.
325	IAP	Bug	• The application no longer terminates the "Mark Final" icon on the tool bar is double clicked.
398	IAP	Bug	• The footer information displays correctly on the ICS-204.
399	IAP	Bug	• The "Go to Page…" button correctly enables after finalizing the ICS-220.
200	IAP	Mod	• The Branch/Division Group blocks 1 and 2 on the ICS-204 to display and print in large bold font. Division Assignment List — 1. Branch: I — 2. Division/Group: A — 3. Incident Name: FROG — 4. Operational Period: 04/13/05 Wednesday Day Shift Shift 0600 - 1800
221	IAP	Mod	• The "kind code" field displays on all filtered drop-down lists on the ICS-204.
228	IAP	Mod	• The trainee identifier will display on all assigned overhead on the ICS-203 and ICS-204.

Application Change Identifier	Module/ Process Affected	Change Category	Description
400	IAP	Mod	• The "Branch" (box 1) on the ICS-204 displays on the tree view.
401	IAP	Mod	• The IAP report engine has been replaced eliminating the requirement for Internet Explorer. This change eliminates several of the printing issues associated with browser settings. Reports will export in PDF format.
419	IAP	Mod	• When preparing an ICS-204, validation of a current ICS-205 will occur when selecting a frequency in block 9.
212	IAP	UI	• A warning message on the Master Frequency list will display a message to inform users that the "Propagate Changes" button will update all saved, unlocked forms.
340	ICARS	Bug	• An application error no longer occurs when you select a date range on underutilized reports.
345	ICARS	Bug	• The "Print Grid" button has been removed from the main screen.
402	ICARS	Bug	• ICARS opens to last database accessed, and no longer prompts the user for a server/database after the initial launch of the application.
89	ICARS	UI	• All reference to the term "Obligations" has been changed to the more appropriate term "Accrual". o In the general reports screen, "Obligations" has been renamed "Accrual Analysis" o To eliminate confusion, a message box has been added to the reports screen stating: "Use this accrual report for analysis only. For reporting accruals to the host unit use the Accrual Module from the Cost main menu." o The Obligation Module on the main ICARS menu has been renamed Accrual Module
71	ICARS	New	• The ability to set an override accounting code for Accruals has been added

Application Change Identifier	Module/ Process Affected	Change Category	Description
349; 350; 351	IMS	Mod	• The wording on screens, labels and message boxes has been changed to improve the process flow.
358	IRSS	Bug	• The autotype feature functions correctly when selecting an incident on the add/edit resource screen. • The data in the IRSS table view will refresh correctly when a new incident is selected in the "Manage Incidents Separately" mode.
360	IRSS	Bug	• To eliminate duplicate Contractors in the database, the add/edit Contractor and agreement fields have been disabled in IRSS. Manage this data in ITS.
403	IRSS	Bug	• The Roster data input functionality was redesigned to prohibit duplicate leaders from being selected resulting in a duplicate resource displaying in the table view.

Application Change Identifier	Module/ Process Affected	Change Category	Description
			* Request Number: C-53 Leader: ☐ Clear * Last Name: SHEHAN * Kind: CC Save * First Name: AUSTIN * Status: C Request Number / Leader / Last Name / First Name / Kind / Status C-53 ☐ ARROWSMITH DON CC C ► C-53 ☐ SHEHAN AUSTIN CC C C-53 ☐ BASTIAN NATISHA CC C C-53 ☐ ARNDT STEVE CC C C-53 ☑ SILLER DEBRA CC C C-53 ☐ ALMOND TERESA CC C
414	IRSS	Bug	• The application will no longer terminate when adding a component to a strike team with an apostrophe in the strike team parent resource name.
415	IRSS	Bug	• When viewing resources using the previous and next buttons, the S/T, T/F Parent box correctly displays the parent resource name when a component is selected.
416	IRSS	Bug	• The application will no longer terminate when the all personnel filter is selected and Tools- Refresh Data is clicked.
61	IRSS	Bug	• The application will no longer generate a Run Time error and terminate when adding data to the Agency, Home Unit, Jetport or State index lists.
73	IRSS	Bug	• The application will no longer terminate when the Add/Edit Resource screen is minimized and the "Add Resource" icon is selected or when the Add/Edit Resource screen is maximized and the save button is selected.
189	IRSS	Consistency	• The sort and filter option functions correctly on the release date field.
361	IRSS	Mod	• Typing a space in the Agency block on the add/edit resource will no longer generate the error "Invalid agency code".
58	IRSS	Mod	• The 209 report prints one page wide.
277	ITS	Bug	• When editing an AD person or crewmember, ITS will require an Area, Class and Rate prior to saving the resource.
388	ITS	Bug	• When adding/editing a contract resource, the hire and release date can be entered at the same time.
404	ITS	Bug	• An apostrophe in the name field will no longer cause a runtime error or terminate ITS when selecting a resource on the "Print OF286" screen

Application Change Identifier	Module/ Process Affected	Change Category	Description
405	ITS	Bug	• The application will correctly "Refresh" when selecting "Manage Incidents as One".
406	ITS	Bug	• AD resources will correctly save when the "Save" button is clicked prior to moving to the address tab.
407	ITS	Bug	• The "post succeeded" dialog box correctly displays all crewmembers.
408	ITS	Bug	• The OF-288 no longer combines the last two crewmembers into one report when only one shift of time was posted to the crew.
417	ITS	Bug	• The Contract Resource post grid will correctly display postings when contract resources have multiple "primary" rates assigned.
62	ITS	Bug	• The accounting code will display correctly in the drop down box on the crew post screen.
70	ITS	Bug	• When editing a person, the tab order was corrected to no longer delete the resource if the user tabs beyond the save button and hits the enter key. • When editing Crew/Operator, the tab order was corrected to no longer delete the default accounting code and terminate ITS if the user tabs beyond the save button and hits the enter key.
409	ITS	Mod	• To eliminate the need to sign each column on the OF-288, blocks 12 and 13 will be grayed out on all but the last column.
63	ITS	New	• To allow adequate space for manually entered time, an extra column will print on the OF288 when "Final" button is selected.
413	ITS	Mod	• When editing personnel or crewmembers no data is saved until the save button is selected.
418	ITS	Mod	• The FedCode column on the Personnel Search screen

Application Change Identifier	Module/ Process Affected	Change Category	Description
			now reads EmpCode.
49	ITS	Mod	• On the OF-286 print screen, the "last day included in invoice" will default to the last date of posted time, not the system date.
95	ITS	Mod	• The "Other" employment code can be selected to apply to all Members/Operators of a selected Crew/Equipment.
284	ITS	New	• The phone number field from a person/crewmember record will print on the OF-288.
410	ITS	New	• The ability to print time records into a faxable report format has been added. This functionality will allow users to filter/group by agency and fax number and establish a date range. Limited faxing capabilities can be utilized directly from ITS using the standard windows fax program.
411	ITS	New	• The ability to process a Partial Payments for the OF-288 has been added.

Application Change Identifier	Module/ Process Affected	Change Category	Description
412	ITS	New	• The ability to associate a rate with the with "Other" payment code has been added.
